

## Java

```
class Solution {  
    public int findLHS(int[] nums) {  
  
    }  
}
```

---

## JavaScript

```
/**  
 * @param {number[]} nums  
 * @return {number}  
 */  
var findLHS = function(nums) {  
  
};
```

---

## C++

```
class Solution {  
public:  
    int findLHS(vector<int>& nums) {  
  
    }  
};
```

---

## C#

```
public class Solution {  
    public int FindLHS(int[] nums) {  
  
    }  
}
```

---
